

commercial building owners/managers:

is your building healthy and resilient?

We are faced with growing challenges in climate preparedness, community vibrancy, and economic prosperity. Being prepared and protecting your building assets with equitable, healthy, zero carbon building practices has never been more important. We invite you to join us and share your experience and expertise in the movement towards a more energy efficient and climate resilient building sector in Grand Rapids.

why focus on buildings? **90%** of people's time is spent inside buildings

40% of global carbon emissions are from the building and construction sector. 28% of that is from building operations.

efficient building upgrades to a property 10 years of age or older can deliver:

carbon management leads to:

- Improved Bottom Line
- Healthy Employees & Community
- Asset Protection
- Talent Retention

- Energy Cost Reductions up to 40%
- Operations Expense Savings of 5-10%
- Competitive Market Advantage
- Value Enhancement of 5-10%

how are we addressing carbon in grand rapids?

The City of Grand Rapids, in partnership with the Grand Rapids 2030 District and the Urban Core Collective, is leading the way nationally on a process to educate, engage and co-create policies and programs with all building stakeholders that will achieve low to zero carbon building sector emissions. This initiative is called the Equitable, Healthy and Zero Carbon Building Initiative (E.H.Zero).

Through E.H.Zero, the City aspires to partner with building stakeholders and residents to create residential and commercial building programs and policies that achieve increased affordability and health outcomes while also increasing energy efficiency and reducing carbon emissions.

E.H.Zero

EQUITABLE. HEALTHY. ZERO CARBON BUILDINGS.

As a commercial building stakeholder, the Grand Rapids 2030 District is your hub for information, assistance, and connection to fellow building owners as our community navigates through equitable carbon solutions. These solutions will have positive outcomes for the resilience of our community and provide asset protection for building owners.
