*Research Center*

The MiGBC Leadership Awards promote outstanding green building initiatives by recognizing projects, organizations, and people who have made extraordinary contributions to achieving healthy, energy-efficient green buildings in the state of Michigan.

This year we recognized 7 projects that showcase true leadership in sustainability and 2 individuals who have made meaningful contributions to drawing down carbon and expanding access to critical public health data.

"This year's award recipients are being honored for their exceptional leadership, innovation, and dedication, which have resulted in outstanding contributions to our community and our built environment. We are proud to celebrate the 2025 Awardees, whose work serves as a powerful inspiration and continues to drive meaningful progress," said Cheri Holman, Executive Director of MiGBC.

The awardees were honored at the 2025 Annual Party & Leadership Awards Ceremony on December 11, 2025. Hosted by MiGBC, the evening event was held at the HighFive Grand Rapids located in the city's downtown. The program included a keynote address by Jason McLennan, creator of the Living Building Challenge and author of the WELL Building Standard, the Awards Ceremony, and a celebration of the year's accomplishments!

Congratulations to our 9 Leadership Awardees of 2025! To learn more about their accomplishments and to see photos from the event visit our [Annual Party & Leadership Awards Ceremony page](#)- where you can also read our 2025 Annual Report.

### **About MiGBC**

Founded in 2004 as the U.S. Green Building Council of West Michigan, our organization has fostered collaboration between stakeholders, shared resources, hosted conferences, and established cornerstone initiatives that cultivate a sustainable future.

In 2024, our organization transitioned to the Michigan Green Building Collaborative (MiGBC) to expand our focus to be state-wide. Over the years, we have acted as thought partners on numerous initiatives across the state, a role we are dedicated to continuing and expanding.

Our mission is to transform the way buildings and communities are designed, built, and operated, in a way that improves the quality of life in Michigan. We believe in the power of partnership to create lasting impact. The organization accomplishes its mission through education, advocacy, programs, and competitions such as the [Grand Rapids 2030 District](#), the [Lansing 2030 District](#), and [Michigan Battle of the Buildings](#).
